### **DETAILED ACTION**

Receipt is acknowledged of the request for continued examination filed 12/17/2009.

The rejection under 35 USC 103(a) over Hansbrough et al is withdrawn after reviewing applicant's remarks.

The following is cited after a patentability review:

### ***Specification***

Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts for compounds or compositions, the general nature of the compound or composition should be given as well as its use, e.g., "The compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class. For processes, the type reaction, reagents and process conditions should be stated, generally illustrated by a single example unless variations are necessary.

Complete revision of the content of the abstract is required on a separate sheet.

The abstract of the disclosure is objected to because should be on a separate page. Correction is required. See MPEP § 608.01(b).

Isologen Technologies, Inc (WO 99/60951) is cited for its disclosure of injectable autologous fibroblasts used for wound healing. The publication date is 12/02/1999 which is after the priority date of the instant application.
